CONSULTANCY

Leading organisations use security as a business enabler. Embracing security as a core business activity reduces costs, improves delivery outcomes and enhances customer confidence. Logiq's cyber security experts will support your organisation as you plan and map your journey to becoming cyber secure.

STRATEGIC TRANSFORMATION

Logiq Consulting has a team of specialist security architects who can understand, develop and deliver solutions to transform your organisation, optimise business and IT services and enhance cyber security.

Using a blended team of Enterprise, Security and Solution Architects, we solve complex problems, simplify legacy capabilities and adopt the latest technology to enable more effective business and operational effect.

Our teams are experienced in a wide-spectrum of technologies implemented across multiple security boundaries, blending knowledge of:

- High security on-premise systems
- Multi-tenancy environments
- Cloud hosting
- Cyber Defence
- Service delivery

Logiq thrives on finding innovative solution to complex, demanding and evolving requirements. We work with our customers to ensure quality and value is realised at every stage of the project.

SOLUTION ARCHITECTURE

Delivering the benefits of Strategic Transformation and cultural change is complex and challenging. Logiq Consulting helps organisations develop and implement cyber transformation strategies to establish cyber security as a key business enabler. We work with organisations, from the C-suite through to technical teams, to ensure the right structure, infrastructure and culture is established to deliver positive cyber outcomes.

Our experienced consultants tailor their approach to your organisation's size, structure and objectives. Our approach delivers a bespoke cyber strategy that supports and compliments business objectives and delivers real benefit.

“ Four in ten businesses (39%) and a quarter of charities (26%) report having cyber security breaches or attacks in the last 12 months. ”

TECHNICAL CYBER SPECIALISTS

Logiq's team of consultants have the latest technical insights and will develop a clear understanding of your organisations objectives. We will then work with you to develop a comprehensive plan and actively manage the threats to your organisation. Working holistically across your business enterprise our experts will ensure that you don't just meet the minimum required standards but are truly cyber resilient.

Our security experts will deliver your plan and when everything is running smoothly will conduct a managed handover. As your Cyber Security Partner we will continue to provide support and ensure you maintain your cyber resilience.

RECENT SUCCESSES

Structured risk assessment methodology – enabled our government client to understand and measure the risk to complex systems. By supporting the client from concept to delivery, we were integral to the management of a successful £50m assessment programme.

Security Assurance Consultancy – delivered security assurance to an organisation running 100+ systems at the highest HMG classification. Logiq led on all information security matters and developed an

excellent working relationship with the client, where embedded support continues to deliver assurance across their entire portfolio.

BUSINESS TRANSFORMATION

Logiq is leading and implementing a cyber transformation programme for a large Government department. This programme is developing a security culture of continuous cyber assurance and moving the organisation away from a traditional security accreditation model. Logiq is responsible for developing the transformation strategy, implementing a series of trials to validate, test, and adjust the strategy which will be followed by implementation across the whole organisation. The programme is ongoing and will re-define the MoD's accreditation model.

- Reduce risks of cyber breaches
- Improve cyber security posture
- Become cyber resilient

If you want to reduce the risk of your organisation being compromised by a cyber security breach and improve your overall cyber security posture, we can provide the support and tools to make your organisation cyber resilient.
